Your very creative title

Introduction: Here is a brief \LaTeX template that I made for simple assignments that require an APA bibliography.

Citation: Citing is simple and easy in \LaTeX . Just use the `\citep` command like this (e.g., Balcetis & Dunning, 2006; Mijović-Prelec & Prelec, 2010). But don't forget to run BibTex or else you won't get your references. For more advanced APA citing options or for more information on why you should use \LaTeX and to learn about some of \LaTeX 's formatting options see my APA Sweave template (Sambrano, 2016, also see the `apacite` \LaTeX package for citation information).
